# Blackboard – Mobile App – Downloading the Student App

The Blackboard mobile app enables students to view and interact with their Blackboard courses. The app is available for iOS 11+ and Android 5+ mobile devices. This handout will provide steps on how to download and install the app.

NOTES:

- The operating system versions may change with updates to the app. Refer to the Quick Start for the Blackboard App page for information on the required versions.
- These instructions were created using the iOS operating system. The Android operating system should be very similar.

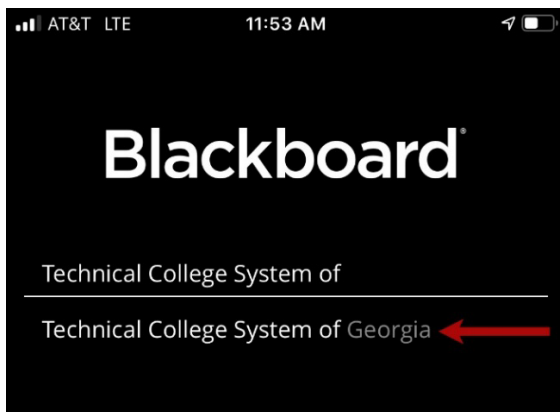

Download and Install the App

1. From the device, access the *app store*.
2. Search for *Blackboard*.

3. Install the app on the mobile device.
4. Select the **Blackboard** app.

5. In the window that appears, search for the college and select it from the list.

NOTE: Be sure to enter **your** specific college when performing the search.

6. Select the **Web Login** button.

7. On the Blackboard screen, enter your *username* and *password* to login.
